

FLUORCAMS

- *Imaging fluorometers that measure sequences of Chlorophyll fluorescence*

FLUOROMETERS

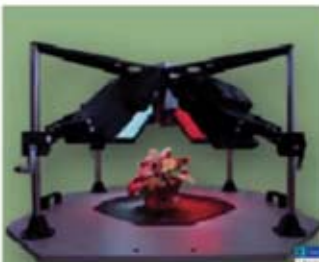

- *Non-invasive assessment of photosynthesis in suspensions, leaves, corals, natural water with phytoplankton or even a single cells.*

PHOTOBIOREACTOR

- *Unique combination of the cultivator and monitoring device which is used for precise phototropic cultivation.*

POCKET-SIZED INSTRUMENTS

- *Family of lightweight devices that are very convenient for quick, reliable and easily repeatable measurements.*

PROFESSIONAL INSTRUMENTS FOR PLANT SCIENCE, BIOTECHNOLOGY, MEDICINE & AGRICULTURE

Specialized in the design and manufacture of custom-made, high quality instrumentation for research in biologically sciences

PRODUCTS:

- Chlorophyll Fluorescence Techniques
- Advanced imaging
- Wide range of compact, pocket sized instrumentation
- High Tech photo bioreactors
- Fytoscopes and incubated shakers
